

UTILITY-SCALE SOLAR

TURNKEY DESIGN, SUPPLY & INSTALLATION FOR THE UTILITY-SCALE SOLAR MARKET

RPCS (RP Construction Services, Inc.) designs, supplies, and builds utility-scale ground mount solar tracker projects. With over 11 years and three gigawatts of experience with Array, RPCS provides EPCs and developers full turnkey service and support.

As the trusted partner of solar tracker pioneer Array Technologies, RPCS is the market's leading provider of the DuraTrack® HZ v3 single axis solar tracker. RPCS's turnkey approach functions with the sole purpose of bringing installation simplicity to every project, providing a more streamlined, cost-effective experience and one-stop shop for ancillary services to maximize project returns.

RPCS's history, experience, and product knowledge provides customers with a trusted choice for seamless project execution.

Working with some of the most respected names in the solar industry, the RPCS team is dedicated to providing the highest quality service and support to its projects and partners.

RPCS has been a valued partner of NARENCO's over the past several years as we have built nearly 200MW together. Their emphasis on safety and quality, as well as their consistency and reliability, are a few of the attributes that make RPCS one of the best in the industry. We look forward to working with RPCS for years to come.

ANDREW GIRALDO

PRESIDENT, EPC & CHIEF FINANCIAL OFFICER
NARENCO
